Carlos Calvo

Systems Analyst

The program was very well structured, and I got the whole context of Agile evolution and where it is now. It has also helped me chart out my future path in an Agile career. The trainers were also kind in clearing a lot of misconceptions I had about Agile and Scrum. What I learned was also easy enough for me to implement at my work at least partially.

Lynette Taylor

CRM Specialist

The sessions were extremely engaging, and the learning resources helped me get a more complete understanding of concepts in Agile and Scrum. Learning about the Scrum Master role changed the way I go about my work. I think this program will benefit anyone even if they are not following any Agile processes.

Astha Thakrar

Customer Success Associate

The course helped me get two valuable certifications, and more importantly gave me so many tools to work with. Agile has opened a lot of possibilities and filled me with ideas that can be applied in everyday work. The remarkable thing about the program was how much it helped me in preparing for the exams. It made me confident at every stage of the process.

Maraina Ross

Marketing Analyst

I am impressed with the job assistance program that happened in this course. Since I was new to Agile it helped me to switch jobs and get into a Scrum Master role, the certifications and the exercises in training also helped me to be confident about how I would perform the role and get the most out of my team while improving their engagement and the quality of output.

David Langlet

Project Lead

The master's program gave me the opportunity to explore Agile concepts in-depth in a brief period. It changed my view, and I can now say that Agile is the future. I also enjoyed the course on Jira and Kanban as I found both very practical to use in my current profile. The whole experience was seamless and the program itself was well curated.
