Profile

Network Security Administrator with 2 years of experience in managing and maintaining secure IT infrastructure. Proficient in implementing security measures, monitoring network activity, and responding to potential threats. Demonstrated success in creating and enforcing security policies, managing firewalls and intrusion detection systems, and ensuring network compliance. Strong analytical and problem-solving skills, along with a commitment to staying current on industry best practices and emerging technologies.

Employment History

Network Security Administrator at Nashville Computer, TN

Mar 2023 - Present

- Successfully implemented a robust network security infrastructure that reduced cyber threats by 80%, leading to a safer and more secure working environment for Nashville Computer, TN.
- Conducted comprehensive security audits and risk assessments for over 50 clients, resulting in the identification and remediation of critical vulnerabilities, and ultimately improving overall network security by 60%.
- Led the development and implementation of a comprehensive employee training program on network security best practices, which increased staff awareness and adherence to security protocols by 75%.
- Managed a team of 5 network security professionals that successfully responded to and resolved over 100 cybersecurity incidents, minimizing potential damage and ensuring business continuity for Nashville Computer, TN.

Junior Network Security Administrator at Sword & Shield Enterprise Security, TN

Aug 2021 - Jan 2023

- Implemented a robust network security system for a client organization, resulting in a 30% reduction in security incidents and a 25% improvement in incident response time within the first six months.
- Conducted regular penetration testing and vulnerability assessments for over 50 client networks, identifying and remediating an average of 10 critical vulnerabilities per assessment, effectively reducing clients' risk exposure by 40%.
- Streamlined the network monitoring processes at Sword & Shield Enterprise Security, leading to a 20% increase in efficiency and a 15% reduction in false-positive alerts, allowing the team to focus on genuine threats more effectively.
- Successfully managed and resolved over 200 network security incidents for clients within the first year, including DDoS attacks, malware infections, and unauthorized access attempts, achieving a 95% success rate in mitigating potential damage and preventing data breaches.
