

# AGILE PROJECT MANAGER COVER LETTER EXAMPLE

## Template

Dear Hiring Manager,

As an Agile Project Manager with a passion for streamlining processes and facilitating collaboration, I was excited to come across the opportunity at Google. Google's commitment to innovation and its impact on the global community has always been an inspiration to me. In fact, I fondly remember the first time I searched for information on Google back in high school, and how it ignited my curiosity in technology and project management.

Throughout my seven-year career, I have successfully managed several complex software projects, consistently delivering quality results ahead of schedule. At Resume Worded, I led a team of 10 developers to complete an extensive platform migration, reducing the average page load time by 40%. This not only improved user experience but also increased customer satisfaction rates by 15%. Drawing from my background in software development, I've been able to bridge the gap between technical and non-technical team members, fostering a collaborative environment that drives project success.

In my most recent role as an Agile Project Manager at Waffle, I championed the implementation of a new project management tool that increased team productivity by 20%. This tool allowed for better

tracking of project progress and facilitated more efficient communication among team members. I'm eager to bring this expertise in process improvement and my passion for collaboration to Google, where I can contribute to the company's mission of making the world's information universally accessible and useful.

Thank you for considering my application. I am looking forward to the opportunity to further discuss how my experience and passion for project management can help drive success at Google.

Sincerely,

[Your Name]
