1. Consequence - Evaluate the consequences of a risk occurring according to 2. Likelihood - Evaluate the likelihood of an incident occurring according to the the ratings in the top row

| Descriptor    | Level | Definition                                     |
|---------------|-------|--|
| Insignificant | 1     | No injury                                      |
| Minor         | 2     | Injury/ ill health requiring first aid         |
| Moderate      | 3     | Injury/ill health requiring medical attention  |
| Major         | 4     | Injury/ill health requiring hospital admission |
| Severe        | 5     | Fatality                                       |

**3. Risk Matrix** – Using the matrix calculate the level of **risk** by finding the intersection between the likelihood and the consequences

| Likelihood        | Consequence   |        |          |         |         |

ratings in the left hand column

| Descriptor        | Level | Definition  |
|-------------------|-------|---|
| Rare              | 1     | May occur somewhere, sometime ("once in a life time / once in a hundred years")   |
| Unlikely          | 2     | May occur somewhere within the Department over an extended period of time   |
| Possible          | 3     | May occur several times across the Department or a region over a period of time   |
| Likely            | 4     | May be anticipated multiple times over a period of time<br>May occur once every few repetitions of the activity or<br>event |
| Almost<br>Certain | 5     | Prone to occur regularly<br>It is anticipated for each repetition of the activity of event                                  |

## 4. Risk Level/Rating and Actions

| Descriptor | Definition   |  |  |  |  |
